

# BLACKBOX TO GLASSBOX

3 MILLIONS OF LINES. UNDERSTOOD IN HOURS. NOT WEEKS.  
AI-Driven Agentic Workflows | Leading Warehouse Software Provider

## INFLECTION POINT

- No docs, millions of lines of code | 3–4 weeks to grasp 30% of platform
- Onboarding blocked | Weeks before first contribution
- Repetitive tickets draining team | 50%+ time lost to support
- Next-gen platform stalled | 0 bandwidth for innovation

## EXIQO ENGINEERED FIX

- **OptimaAI Platform:** Agentic pair-programming — architecture mapped in real time | 30–40% platform comprehension in hours
- **Context Engineering:** Historical patterns analyzed, issues linked to exact code | Recurring tickets resolved at source automatically
- **AI SDLC Playbook:** Cursor AI, GitHub Copilot, Lang Graph in live workflow | Support lifecycle automated across 7 components
- **AI-EV Program:** Beginner-to-Builder pathway → engineers moved from AI-assisted coding to owning agentic workflows & automated support resolution | Compressed onboarding, full codebase autonomy

40%

Faster Onboarding — engineers contributing to days, not weeks

50%+

Support Overhead Eliminated — routine tickets auto-resolved, team fully on next-gen
