45 REPORTS. 8 WEEKS. 2X VELOCITY. AI-FIRST.
Global FinTech | Payment Orchestration Platform | Report Migration

EXIQO

INFLECTION POINT

- 45 complex Looker reports needing full rebuild | **~12 hours per report manually**
- React team, zero Vue.js 3 experience | **Steep curve, no runway to ramp**
- 8-week deadline, zero margin for error | **Budget fixed, quality non-negotiable**
- Client coding standards must be matched | **Every report: conventions, tests, zero regressions**

EXIQO ENGINEERED FIX

OptimaAI Platform: Cursor Agents coordinating dev workflow — first-draft migration code aligned to standards from day one | **2× productivity, 5–6 reports/sprint vs. 3**

Context Engineering: Reusable prompt templates per chart type — all docs indexed, zero trial-and-error | **Code reuse 10% → 40%+**

AI SDLC Playbook: Automated code review, test generation & PR validation — every output reviewed, refined & deployment-ready | **Dev time 12hrs → under 7hrs, minimal regressions**

AI-EV Program: Beginner-to-Builder pathway → engineers delivering Vue.js 3 via AI-assisted live codebase — no classroom | **Production-ready from sprint one**

2X

Development Velocity — 50% effort reduction, 45 reports delivered in 8 weeks

40%+

Code Reuse — client called it a new standard for technology partnerships
