INFLECTION POINT

- Fragmented tools for chat, voice & workflows | **Overhead compounding every sprint**
- No governance or cost visibility at scale | **Usage, tokens, spend — all invisible**
- Stateful multi-agent flows beyond basic LLM | **Zero orchestration capability**
- Rapid growth, no scalable foundation | **Performance & security at risk**

EXIQO ENGINEERED FIX

OptimaAI Platform: Single governed system — chat, voice & agentic workflows coordinated & deployed seamlessly | **3× concurrent agent interactions supported**

Context Engineering: Prompt tuning across chat, voice & agentic workflows — consistent signal quality, zero trial-and-error | **Full conversation traceability**

AI SDLC Playbook: Automated agent testing, deployment pipelines, KPI tracking & release governance | **40% faster agent delivery**

AI-EV Program: Builder-to-Champion pathway → engineers owning multi-agent orchestration & cloud-native ops at scale | **Compressed onboarding, platform self-sustaining**

40%

Faster Agent Delivery — unified tooling, reusable workflows, zero context switching

3X

Platform Scale — concurrent interactions tripled, zero performance degradation
