

# AI CUTS PEDIATRIC CLAIM DENIALS BY 70%

END-TO-END RCM TRANSFORMATION FOR PEDIATRIC HEALTHCARE

AI-Driven Revenue Cycle Management | Pediatric Multi-Specialty Practice

## INFLECTION POINT

- 10–15% claim denial rate (commercial payers up to 15.1%) | Reimbursement cycles stretched to 45–60 days, directly impacting cash flow and accounts receivable
- Only 0.8% self-pay collection rate due to confusing bills and lack of payment flexibility | Poor patient financial engagement undermining revenue recovery
- Complex pediatric billing with age-specific codes, coverage milestones, and Medicaid intricacies | High volume of low-value claims compounding coding errors and denial risk

## EXIQO™ ENGINEERED FIX

**OptimaAI Platform:** AI-driven RCM optimization with intelligent pre-submission claim checks and real-time denial alerts, reducing claim denials by up to 70% and accelerating reimbursement cycles

**Context Engineering:** Specialized pediatric coding expertise with certified coders ensuring accuracy across age-specific CPT/ICD-10 codes, coverage milestones, Medicaid rules, and modifier complexity

**AI SDLC Playbook:** Dedicated denial management team with root-cause analysis, recurring issue resolution, and persistent appeal handling, systematically eliminating denial patterns at their source

**AI-EV Program:** Patient-centric financial engagement with simplified billing, digital payment options, flexible plans, and financial education, dramatically improving self-pay collection rates
